

## TE1 Electric Cart Attachment

Mobile roll handling cart designed to quickly and safely lift, rotate and maneuver a roll.

### **POWER REQUIREMENTS**

Unit integrated with on board battery. Cart plugs into standard 110V wall outlet to charge.

### **SPEED**

Approximately 10 seconds per tip.

### **TIPPING RESTRICTIONS**

No limit to cycles per hour.

### **WEIGHT**

Attachment weighs 226lbs

### **CAPACITY**

See Chart on page 2.

### **CONTROLS**

Tip up/ Tip down, Mast up/ Mast down, and tooth release controls located near push handles

### **PROBE**

All Tip Lifts probes are interchangeable. Probes Feature a patented design that prevents a roll from being release unless the weight of the roll is supported. This prevent unintentionally releasing the roll when the operator is not ready.
